

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
July 25	Olympia	42			
28	Belize	18			
29	Asbury Fountain.....	9			

The steamship *Olympia* and schooner *Asbury Fountain* cleared from Puerto Barrios.

Outbreak of yellow fever at Zacapa.

AUGUST 2, 1905.

The first information of yellow fever at Zacapa was received in a telegram from the general manager of the road to the agent at Barrios, notifying him that a strict quarantine had been established against Zacapa, as 9 deaths had occurred there from yellow fever on July 30, and that by orders of the President of Guatemala all passenger traffic had been suspended on the railroad.

Zacapa is 102 miles from Puerto Barrios on the Guatemala Railroad, and the infection was most likely carried from Livingston, Guatemala.

At present I have no further information regarding the number of cases or the condition of Zacapa.

HONDURAS.

Reports from Ceiba, fruit port.

Acting Assistant Surgeon Robertson reports as follows: Week ended July 29, 1905. Present officially estimated population, about 4,000; 1 death; prevailing disease, malarial, mostly mild type; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
